Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 April 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Applicant uses language such as "...wherein a pipe formed and an adjacent chamber with openings formed..." it is unclear as to what is actually being claimed. "...a cylinder container formed on a top..." it is unclear as to what formed on a top is suppose to be (i.e., formed on a top of what?). "...wherein, a packing formed on a top..." it is unclear as to what formed on a top is suppose to be. The orientation of the partition is also unclear. The examiner has only noted a few examples of language that makes it unclear as to what is actually being claimed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which

Art Unit: 3743

said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shiue (6,843,246) in view of Evans (WO 94/29167). The claims are rejected as best understood by the examiner.

Shiue in a snorkel discloses an anti-surf head (Figs. 1-4) comprising an anti-surf head body (30), a pipe and an adjacent chamber with openings (Figs. 1-4), a cylinder container, a buoy formed inside the chamber (40), packing formed on a top (42); a partition formed on a bottom of the cylinder container a set of guiding groove (35); a lid (70).

The difference between Shiue and claim 1 is o-rings. Evans in a snorkel teaches o-ring (42) providing a watertight seal. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device of Shiue to employ any well known o-ring doing so would have provided a means to provide a water tight seal including the o-ring taught by Evans.

With respect to claim 2, Shiue discloses the buoy on a lateral of the anti-surf head (Figs. 1-4).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The balance of art is cited to show snorkel devices: 6,679,253; 5,117,817.
